Real or AI?

DRAWING PROMPT

Draw a robot making art! What do you think it looks like when AI creates a picture?

Intro to Project

- Create storybooks with AI image generation
- Groups of 4 to 5 people
- You will: write a story, create images with AI, and put it together into a picture book
- We will be using online AI generation software and Google Slides to complete the project

Let's look at
an example

Captain Whiskers and the Missing Donut

**A crime. A cat. A missing breakfast
item.**

**Captain
Whiskers was
the greatest
cat detective
in Meowville.**

**He wore a tiny
trench coat, a
fancy hat, and
never missed
a clue.**

**One morning,
disaster
struck.**

**The mayor's
jelly donut had
vanished!**

**Captain
Whiskers sniffed
the clues.**

**He questioned
the pigeons.
He interrogated
the goldfish.**

**He even chased
a squirrel.**

**Just when
all hope
seemed
lost...
Captain
Whiskers
noticed
something
odd.**

**The mayor's mustache
was covered in jelly!**

**Case
closed.**

**The mayor
had
sleepwalked
and eaten it
himself!**

**Captain
Whiskers got
a new title:
“Hero of
Breakfast.”**

**And he finally
got his own
donut, with
extra jelly.**

DRAWING PROMPT.....

Draw what kind of story you would want to make. A princess in space? A detective turtle? Anything that comes to mind.

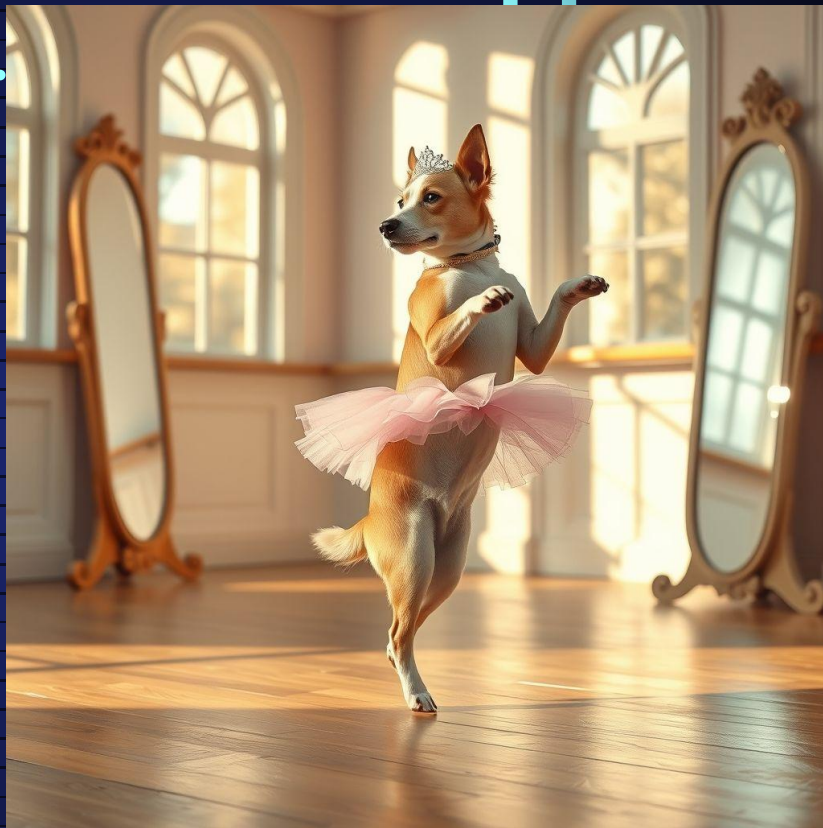

What is AI Image Generation?

- Computer generates information based on its knowledge
- AI starts by collecting and looking at a bunch of pictures - this is a period called training
- Then, using its collection of pictures, it generates an image of what you want

Prompt: a dog dancing ballet
with a tiara and tutu on

Prompt: a giant forest made of candy

Sometimes AI will get confused....

Prompt: Cartoon mermaid playing the piano on a rock, surrounded by seagulls

First Try

Second Try

Third Try

DRAWING PROMPT

Draw a silly image you'd want the AI to make. What words would you use to describe it?

Let's Make
Groups!
